AEDAN M. BARNES-SHUMWAY

Management Information Systems | GRC & IT Business Systems Analyst (Entry-Level)

Sacramento, CA | 916-616-3324 | aedanmatthew2001@outlook.com | linkedin.com/in/aedan-barnes-shumway | aedanmbs.github.io

PROFESSIONAL SUMMARY

Management Information Systems student (B.S., California State University, Sacramento — expected December 2026) with over two years handling confidential investigative materials at the California Department of Justice. Coursework spans information systems security, database systems, and systems development life cycle, paired with hands-on project work designing a cybersecurity ranking platform. Currently preparing for the CompTIA Security+ exam. Seeking an entry-level GRC Analyst, IT Business Systems Analyst, or SOC-track role in Sacramento or the Bay Area.

TECHNICAL SKILLS & COURSEWORK-BASED SECURITY KNOWLEDGE

- **Languages & Querying:** SQL, Python (scripting for security automation, in progress), Visual Basic
- **Platforms & Tools:** Linux, Microsoft Office (Word, Excel, Outlook), Agile/Scrum
- **Security Fundamentals (MIS 170):** risk & vulnerability assessment, access control, authentication, encryption, security policy & standards, IT risk management and audit
- **Systems & Data:** systems analysis & SDLC, relational database design, data integrity/backup/recovery, enterprise networking (LAN/WAN/cloud)
- **Core Strengths:** process documentation, systems analysis, database maintenance, technical troubleshooting, administrative coordination

CERTIFICATIONS

- **CompTIA Security+ —** Exam planned for December 2026, following completion of MIS 170 coursework

PROFESSIONAL EXPERIENCE

Student Assistant | California Department of Justice — Sacramento, CA

March 2023 – October 2025

- Supported confidential criminal investigations in a highly restricted, need-to-know environment, handling sensitive case materials under strict departmental data-handling protocols.
- Analyzed and documented investigative case files, producing comprehensive reports and coordinating directly with investigative agents to support case resolution.
- Coordinated archival and records-retention workflows using Excel-based tracking, review, and audit processes across departmental units.
- Authored and maintained standard operating procedures in Microsoft Word to improve documentation clarity, consistency, and compliance across departmental workflows.

Assistant | International School of Tactical Medicine — Sacramento, CA

August 2014 – October 2024

- Tracked inventory levels for training supplies and equipment to support program readiness.
- Managed training event schedules and administrative coordination through Outlook and Excel.

PROJECTS

Purple Meridian Index — Founder & Developer | Independent Project — Sacramento, CA

2026 – Present

- Designing and building a web platform that ranks cybersecurity job candidates by demonstrated skill rather than resume alone, using a statistical rating algorithm from the same family used for chess and competitive-gaming rankings to generate an objective score.
- Built working HTML prototypes and am now developing the production version — a TypeScript/Next.js web application with a Supabase database — in a Linux (WSL2) development environment.

EDUCATION

California State University, Sacramento — B.S., Management Information Systems
Expected December 2026

CSUS GPA: 3.94/4.00 | Dean's Honor List: Spring 2025, Fall 2025, Spring 2026

American River College — A.S., Business Administration
December 2024

GPA: 3.67/4.00

RELEVANT COURSEWORK

- **MIS 170 — Information Systems Security** *(In Progress, Fall 2026)*: IT security framework for enterprise infrastructure — risk and vulnerability analysis, common attack techniques, encryption, authentication, access control, security policy & standards, and IT risk management/audit.
- **MIS 161 — Information Systems Practicum** *(In Progress, Fall 2026)*: Capstone integration of MIS coursework through a full information systems project spanning SDLC, project management, application development, database management, and security.
- **MIS 160 — Systems Development Life Cycle**: Team-based analysis, design, and development of a business information system using structured SDLC methodology, tools, and case techniques.
- **MIS 150 — Database Systems for Business**: Relational and object-relational database modeling; database creation and manipulation; data administration, integrity, privacy, backup, and recovery.
- **MIS 140 — Business Data Communication**: Enterprise data communication networks — wired/wireless LAN, WAN, internet, and cloud infrastructure.
- **MIS 101 — Computer Information Systems for Management**: Information systems from a management perspective — transaction processing, decision support, strategic planning, and security/controls in IT acquisition.
- **MIS 130 — Responsible Use of AI** *(In Progress, Fall 2026)*: Ethical, legal, and governance dimensions of AI systems — bias, fairness, transparency, and accountability in AI deployment.
- **BUS 162 — Project Management**: Project management processes, methodologies, and tools — scheduling, resource allocation, and life-cycle cost management.

TARGET ROLES

Entry-level GRC Analyst | IT Business Systems Analyst | Cybersecurity Support / SOC-Track | State Government IT & Systems Operations
